

INDUSTRY SOLUTION NOTE

Legal / Law

Cygilant's Security-as-a-Service delivers advanced 24/7/365 cyber-threat detection and incident response monitoring (MDR), as well as vulnerability management and patch management.

Law firms face increasing cybersecurity obligations – from clients who require audits, questionnaires and adherence to their regulatory compliance mandates, from state bars, and from the ABA requiring attorneys to live up to their duty of confidentiality and competence. Poor cybersecurity can potentially result in attorney discipline, legal malpractice allegations, and even civil litigation. But while attacks are increasing, your IT budgets, staff and their available time probably isn't.

This is where Cygilant's Security-as-a-Service can help. We provide:

- Around-the-clock Security Operations Center (SOC) as-a-Service, SOC analysts and threat hunters who are on guard 24/7/365 conducting time-consuming incident investigation and analysis
- A trusted Cybersecurity Advisor dedicated to you who manages a SOC team, identifies threats, provides security best practices and helps prepare audit artifacts
- Low cost access to best-of-breed technologies managed by Cygilant's security experts for you to reduce risk and assist with compliance mandates

Key Benefits

IMPROVE SECURITY

Get comprehensive, up-to-the-minute threat intelligence, visibility into security events and vulnerabilities, real-time incident notification, and guidance to quickly address security issues

EXTEND YOUR IT TEAM

Let our security experts supplement your IT team, working for you and doing time-consuming incident investigation and analysis

ACCESS BEST-OF-BREED TECHNOLOGY

Leverage integrated managed Log Management, SIEM, and Vulnerability Assessment, and Patch Management technologies

ACHIEVE COMPLIANCE

Know you'll be prepared for an audit at any time with regular reporting aligned with your compliance requirements

Industry Security & Regulatory Requirements

Legal firms and law offices must adhere to their clients' regulatory compliance mandates. These may include the following:

- Payment Card Information Data Security Standard (PCI DSS)
- General Data Protection Regulation (GDPR)
- California Consumer Privacy Act (CCPA)
- Health Insurance Portability and Accountability Act (HIPAA)
- Health Information Technology for Economic and Clinical Health Act (HITECH)
- Gramm-Leach-Bliley (GLBA)
- Data Breach Notification and Privacy Laws at the state level

Cygilant can help you monitor and protect your network from a costly data breach, as well as meet the monitoring and auditing requirements contained in these regulations.

- **Save Time** – Let your team focus on high impact tasks, knowing cybersecurity experts are monitoring your network security 24/7/365
- **Save Money** – Our affordable subscription-based service delivers immediate return on investment
- **Lower Risk** – Services for proactive patch management, incident detection and response ensure cybersecurity needs are met

Build An Effective Security Program

If you're struggling with your IT security and compliance posture because of lack of time, budget, skills, or people, Cygilant is here to help.

Cygilant Managed Detection and Response (MDR) – 24/7/365 threat detection, compliance monitoring, and SIEM and Log Management at a fraction of the cost of alternate solutions. Supplement your IT security team and gain peace of mind knowing your systems are monitored around-the-clock by Cygilant's team of security analysts.

Cygilant Unified Vulnerability and Patch Management – Continuous vulnerability scans, risk prioritization, and auditable patch management to reduce your attack surface. Our Patch Management services reduces the time and complexity associated with patching servers, desktops and laptops on or off your network, including 3rd-party applications.

- Get the flexibility and cost savings of security-as-a-service.
- Access a world-class team of cybersecurity experts
- Adopt field-tested cybersecurity best practices
- Use best-of-breed integrated technology
