

CASE STUDY

Fonative Uses Cygilant Security-as-a-Service

Industry

- Telecommunication

Challenge

- Establish security operations
- Lower cybersecurity costs
- Maintain PCI and HIPAA compliant environments

Solution

- Cygilant Security-as-a-Service

Result

- Accessed flexible managed security
- Gained cybersecurity expertise without building or retain in-house staff

To secure its Communications Platform as a Service (CPaaS), Fonative turned to Cygilant Security as a Service.

Cygilant Security-as-a-Service minimizes the costs associated with establishing a security operations center and enables Fonative to focus on its core business: providing cost-effective telephony solutions to its customers.

“Fonative customers operate in highly regulated industries that require us to maintain PCI- and HIPAA-compliant environments,” said Howie Cheney, COO, Fonative. “Cygilant allows us to meet both compliance requirements, access an ideal mix of cybersecurity features and services in a flexible OpEx model, and tap into senior cybersecurity experts that we would not be able to retain in-house.”

“Cygilant allows us to tap into senior cybersecurity experts that we would not be able to retain in-house.”

- Howie Cheney, Fonative

Managed Detection and Response (MDR)

24/7/365 threat detection, compliance monitoring and SIEM and Log Management through a cloud-based SOC-as-a-Service. Customers get curated actionable alerts which we've investigated, and we provide remediation guidance.

About Cygilant

Cygilant Inc. delivers Cybersecurity-as-a-Service to mid-sized organizations that have limited IT resources yet require 24x7x365 protection. Through its SOC and dedicated Cybersecurity Advisors that extend a customer's IT team, Cygilant provides affordable cloud-based security monitoring that hunts for threats, responds to incidents, patches systems and supplies audit artifacts for compliance mandates.
