

INDUSTRY SOLUTION NOTE

Healthcare

Cygilant's SOCVue[®] is a hybrid security-as-a-service offering that helps reduce information security risk and meet HIPAA compliance requirements.

For more information or to request a demo, visit www.cygilant.com

Healthcare providers face dramatic security challenges as organizations move from paper to electronic records. Security incidents affect patient care as well as patient privacy. In addition, HIPAA regulations call for stringent access control and auditing for any systems that transmit and store electronic protected healthcare information (ePHI). SOCVue provides the right people, process, and technology for an effective security program:

- **Around-the-clock Security Operations Center (SOC), staffed by Cygilant's security experts, providing you with 24/7/365 coverage of your critical IT assets**
- **Alignment with critical security controls to proactively reduce risk and take compliance beyond a checklist mentality**
- **Low upfront cost and access to best-of-breed technologies combined with Cygilant security experts that manage the solutions**

Key Benefits

ENHANCE SECURITY VISIBILITY

Get continuous visibility into security events and vulnerabilities with real-time incident notification along with guidance for quickly correcting any security gaps

EXTEND YOUR IT TEAM

Supplement your team with Cygilant's 24/7/365 Security Operations Center staff

ACHIEVE COMPLIANCE

Go beyond compliance checklists with a continuous assessment of your security frameworks

ACCESS BEST-OF-BREED TECHNOLOGY

Save time and money by leveraging managed Log Management, SIEM, and Vulnerability Assessment, and Patch Management technologies

Industry Security & Regulatory Requirements

The Health Insurance Portability & Accountability Act (HIPAA) requires healthcare providers to:

- **Implement proper security incident procedures**
- **Ensure that logging and auditing procedures are in place**
- **Establish and enforce information security best practices**

Failure to comply with HIPAA regulations can result in substantial financial penalties. Healthcare organizations cannot afford to wait for a data breach to occur.

SOCVue
Helps:

- **Save Time** – Adding headcount is difficult and the IT staff is often already stretched thin
- **Save Money** – Big, expensive technology projects and professional services are not always an option
- **Lower Risk** – Without the resources to chase every evolving threat, a focus on proactive, risk-based assessment and remediation is critical

Build An Effective Security Program

If you are struggling with your organization's IT security and compliance posture because of lack of time, budget, or people, Cygilant is here to help. With Cygilant, you can implement a comprehensive proactive and reactive security monitoring program to protect against modern-day cyber threats while meeting regulatory mandates.

Cygilant's SOCVue services give you the flexibility and cost savings of a security software-as-a-service offering, while also providing a world-class team of security experts, cybersecurity best practices, and best-of-breed technology. SOCVue Security Monitoring gives you 24/7/365 visibility and control over your IT environment while SOCVue Vulnerability Management reduces your attack surface and mitigates risk with unlimited scans using the industry-leading Qualys® Cloud platform. SOCVue Patch Management reduces the time and complexity associated with patching servers, desktops and laptops on or off your network.
