

INDUSTRY SOLUTION NOTE

Technology

Cygilant's SOCVue[®] is a hybrid security-as-a-service offering that helps detect security threats and proactively reduce cyber risk.

For more information or to request a demo, visit www.cygilant.com

Intellectual property and proprietary data are among the most critical assets that a technology company possesses. This data is often a lucrative target for cyber espionage. Guarding against attack requires monitoring thousands of security events and proactively detecting vulnerabilities, which can quickly become an overwhelming task. SOCVue provides the right people, process, and technology for an effective security program:

- **Around-the-clock Security Operations Center (SOC), staffed by Cygilant's security experts, providing you with 24/7/365 coverage of your critical IT assets**
- **Alignment with critical security controls to proactively reduce risk and take compliance beyond a checklist mentality**
- **Low upfront cost and access to best-of-breed technologies combined with Cygilant security experts that manage the solutions**

Key Benefits

ENHANCE SECURITY VISIBILITY

Get continuous visibility into security events and vulnerabilities with real-time incident notification along with guidance for quickly correcting any security gaps

EXTEND YOUR IT TEAM

Supplement your team with Cygilant's 24/7/365 Security Operations Center staff

ACHIEVE COMPLIANCE

Go beyond compliance checklists with a continuous assessment of your security frameworks

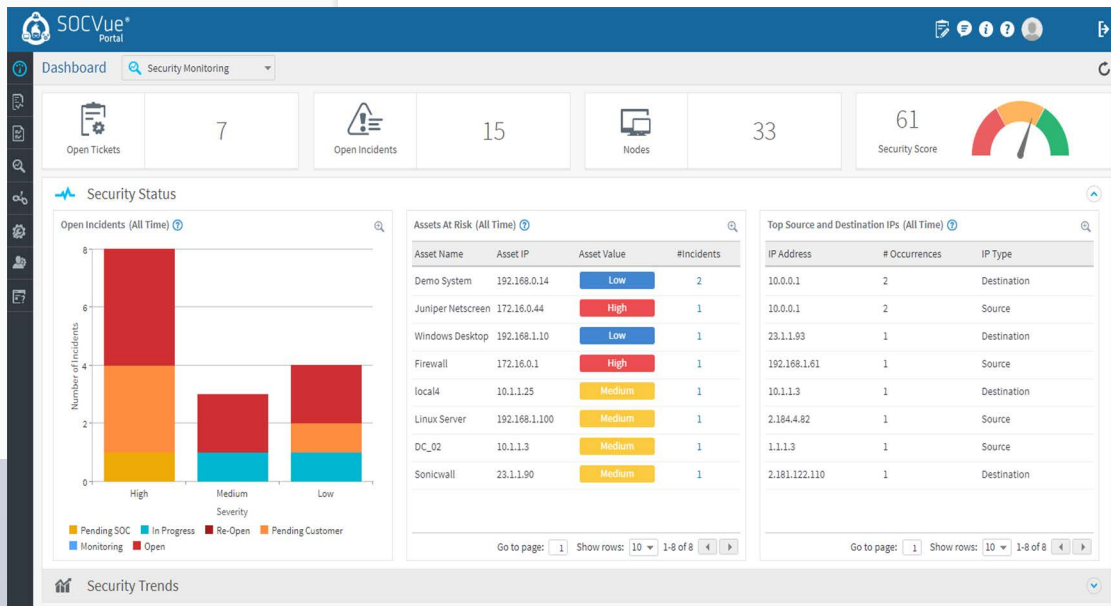

ACCESS BEST-OF-BREED TECHNOLOGY

Save time and money by leveraging managed Log Management, SIEM, and Vulnerability Assessment, and Patch Management technologies

Industry Security Requirements

Like many organizations today, technology firms must respond to security cyber threats and vulnerabilities in order to protect vital company information from unauthorized access. However, a growing company does not want a complicated security project to distract from the core mission.

Access your security monitoring data anytime, anywhere, with the SOCVue Portal.

SOCVue Helps:

- **Save Time** – Adding headcount is difficult and the IT staff is often already stretched thin
- **Save Money** – Big, expensive technology projects and professional services are not always an option
- **Lower Risk** – Without the resources to chase every evolving threat, a focus on proactive, risk-based assessment and remediation is critical

Build An Effective Security Program

If you are struggling with your organization's IT security and compliance posture because of lack of time, budget, or people, Cygilant is here to help. With Cygilant, you can implement a comprehensive proactive and reactive security monitoring program to protect against modern-day cyber threats while meeting regulatory mandates.

Cygilant's SOCVue services give you the flexibility and cost savings of a security software-as-a-service offering, while also providing a world-class team of security experts, cybersecurity best practices, and best-of-breed technology. SOCVue Security Monitoring gives you 24/7/365 visibility and control over your IT environment while SOCVue Vulnerability Management reduces your attack surface and mitigates risk with unlimited scans using the industry-leading Qualys® Cloud platform. SOCVue Patch Management reduces the time and complexity associated with patching servers, desktops and laptops on or off your network.
